Halifax Nova Scotia • Halifax Convention Centre
APRIL 4 - 6, 2019

Dr. Archna Shah

SESSION 206

Pediatric Resuscitation Cases

Use of a case based approach to address some common resuscitative scenarios and strategies for managing the critically ill child. Case presentations include airway management, respiratory distress, shock and trauma.

1. Review of current PALS guidelines applicable to the cases.
2. Review of current guidelines from ATLS for the management of pediatric trauma, applicable to the cases.
3. Review of available pediatric emergency medicine resources and tools, such as TREKK.
