SESSION 242

Collaborate to Survive

Members of an effective collaborative practice in rural PEI use story-telling, humour and multi-media clips to demonstrate the value of collaboration. No-one person is perfect, but a team can be a lot less imperfect. And a team might survive the loss of one member while a one-person service is toast if that person leaves.

1. Achieve high level of interaction—COME IN, SIT DOWN AND SPEAK UP!
2. Share experiences of collaboration—the good, the bad and the ugly—in a safe and relaxed atmosphere.
3. Work out the kinks.
4. Share tips for efficient working.
