

SESSION 267

A Review of STEMI & Equivalents

A review of can't miss ECGs in the rural ER including non-classic STEMI equivalents that warrant acute re-perfusion therapy.

1. Briefly review of current guidelines on classic STEMI.
2. Identify non-"classic STEMI"/STEMI equivalent ECG patterns that require stat re-perfusion and/or close consultation with cardiology.
3. Identify non-guideline ECG patterns that require consideration of urgent re-perfusion strategies and/or very close monitoring.
