

## SESSION 271

# The Infrequent Travel Med Consult – PART 2: Meds, Special Populations, and Resources

The infrequent travel medicine consult. Part one will focus on an overall approach to the travel medicine consult, will discuss infectious disease/injury prevention counseling and focus on routine and travel vaccines for travelers. Part two will focus on travel medications and also special populations, including children, pregnant women, immunocompromised, and VFRs (those visiting friends and relatives). I will also discuss easy-access resources for you as the health care provider. common travel vaccinations and medications and touch upon infectious. While you will get the most out of attending both sessions, they will be presented as stand-alone sessions for those only able to attend one.

Samantha Chittick is a recent graduate doing rural Family Medicine locums in Southwestern Ontario. She volunteers a couple months a year (a cumulative 8 months so far) at a small rural hospital in West Africa. In the last few years she has undergone approximately 1000 hours of in-person and online coursework, modules, and study in tropical medicine through the University of Minnesota, to obtain a Certificate of Knowledge in Clinical Tropical Medicine and Travelers' Health (CTropMed) through the American Society of Tropical Medicine and Hygiene (ASTMH).

1. Review indications, contraindications, and the use of prescription and non-prescription travel medications.
2. Review vaccinations, medications, and recommendations for pregnant women, pediatric patients, immunocompromised patients, and those visiting friends and relatives (VFR).
3. Provide some point of care resources for you in your office
